-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1-10 are objected to because of the following informalities: the terms "can be" and "being possible" as claimed are not positively recited and do not add any patentability to the claims limitations. Appropriate correction is required.
2. The term "mounded" in claim 1, should be changed to "mounted" or appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Meyerhoefer et al (US patent 5,637,011).

Meyerhoefer's device discloses a device for guarding access for at least two distributor modules telecommunications and data systems equipment, with each distributor module being formed with at least one system side and at least one subscriber side (col. 3, lines 20-55), each terminal at 36 side being formed with at least one row of insulation-displacement contact elements, the distributor modules (see fig. 4) to be mounted on a mounting frame (10) at least access to the system sides to be guarded by at least one locking device at 142; the subscriber sides be guarded by at

least one locking device, the access guard for the subscriber side of at least one distributor module being unlockable independently of the other distributor modules; the locking device is formed by at least one locking bar and at least one screw or pin at 143, each distributor module is securely connected to the mounting frame (10) by at least one locking device at 142; the mounting frame by at least one common locking device (F); the locking bar of the locking device engages in the distributor modules by means of at least one spike; the access to at least one terminal side of the distributor module being guarded by the plate frame being arrestable by locking device at 142; at least one distributor module is formed with a row of center taps (see fig. 4). The term "for" as recited in the claims with other limitations has not been given any patentable weight because it is narrative in form. In order to be given patentable weight, a functional limitation must be expressed as a "means" for performing the specified function, as set forth in 35 USC 112, 6th paragraph, and must be supported by recitation in the claim of sufficient structure to warrant the presence of the functional language. In re Fuller, 1929 C.D. 172; 388 O.G. 279.
